

**PAS have been supplying sound and video systems to Statham Lodge for many years and have progressively installed modern equipment to the various function suites throughout the venue including an external system for the wedding gazebo.**

A combination of Bose sound systems, radio microphones and quality video projectors and screens have been installed to allow hotel staff cater for most event requirements without the need to hire in.

Our relationship with the hotel has developed over the years with managers knowing they can pick up the phone and speak directly to our technical support staff who can guide them through any particular requirement or setup issue.
