CANOLFAN ADDYSG Y BONT

Ysgol y Bont is a co-educational day special school, specialising in the care and education of students between the ages of 3 and 19 years. The new two storey, eco-friendly school will provide modern learning facilities including new classrooms, multi-purpose hall, hydrotherapy pool and sensory rooms.

PAS were contacted and asked to supply and install a site wide public address and class change system for the new school. We supplied a discrete and effective communication system throughout the buildings to classrooms, circulation areas and halls.

The system signals class change signals with pleasant electronic tones triggered by a programmable timer.

Special care and attention had to be given to the use of class change and announcement tones so as not to cause any kind of distress to the pupils when activated. As a result, the final system setup serves to work by reducing the negative aspects of disability in an environment which offers warmth, security, consistency and understanding to it's students.
